

Anshul Akotkar - Senior Software Engineer

Bengaluru, India • anshul041094@gmail.com • [linkedin.com/in/anshul-akotkar](https://www.linkedin.com/in/anshul-akotkar)

Summary

Senior Software Engineer with 9 years building reliable, highly scalable products; currently at Best Buy India, architecting the post-purchase self-service support experience. Full-stack range spanning React/React Native/Next.js frontend engineering, Node.js backend services, cloud deployment (AWS OpenShift/EKS, GCP), production observability, and applied agentic AI (multi-agent orchestration on Gemini 2.5 Pro via Vertex AI). Led the design of a support-routing system that reduced live-agent dependency and drives an estimated \$67.5M in revenue.

Professional Experience

Best Buy India - Bengaluru, India

Senior Software Engineer

September 2024 - Present

- Architected and led development of LLM-powered post-purchase experience platform serving 8M+ annual users, driving an estimated \$67.5M in revenue and reducing agent handle time by 40% across 10,000 daily interactions.
- Designed for peak-season scale, the system reliably processes 700M to nearly 1B requests during Black Friday, Cyber Monday, and Halloween surges.
- Built the customer-facing web and mobile experience in React, React Native, and Next.js, backed by Node.js API endpoints and middleware, and distributed systems.
- Designed and shipped a multi-agent, multi-modal AI system on Gemini via Vertex AI in GCP, extending to photo/video uploads, live streaming, and voice input, and connected it via an MCP client/server layer (JSON-RPC 2.0, tools/resources/prompts primitives) now adopted by other teams at Best Buy.
- Built an AI-powered Adaptive Support Explorer combining natural-language-to-SQL, PII guardrails; implemented DMN decision modelling, optimized BigQuery analytics for support demand and outcome trends; interactive D3/A2UI visualizations that turned complex decision data into actionable insights for product, support, and engineering teams.
- Implemented production observability, Kibana-based logging, dashboards, and failure-rate alerting, plus Dynatrace session monitoring to proactively catch and debug user-facing issues.
- Built CI/CD pipelines (GitHub Actions) to bundle and publish builds to Artifactory and deploy to AWS OpenShift/EKS across environments.
- Mentored and technically led a team of engineers, and contributed to engineering process and documentation standards across the org.

MFine, Novocura Tech Health Services - Bengaluru, India

Senior Software Engineer

November 2020 - September 2024

- Contributed to Mfine's healthcare app and web platform (million-plus downloads), enabling users to consult doctors via chat, audio, or video, and to an AI-powered AutoDoc tool that collects patient symptoms for doctor diagnosis.

- Led a cross-functional agile team of 12 to develop a Corporate Wallet project, onboarding 60+ corporates and improving daily active users by 47%; Increased annual recurring revenue by \$500k.
- Architected and led the development of the D2C skincare commerce project, monitored end-to-end delivery, and recorded a 30% faster go-live time.
- Enhanced payment gateway capabilities by integrating UPI intent flow, resulting in a 15% increase in payment success metrics.
- Secured network connection between client & server by establishing dynamic public key SSL Pinning, preventing MITM attacks.

HED Experts Pvt Ltd - Bengaluru, India

Product Engineer

June 2017 - November 2020

- Developed the skill augmentation Xcelerator platform. Web application and backend services developed using React JS and Elixir, Phoenix, respectively, from scratch.
- Created system design and architecture for microservices, resulting in a 70% reduction in deployment time.
- Worked on SEO optimization, which increased web platform visibility by 35% and increased organic traffic by 15%.

Publicis Sapient - Noida, India

Web Development Trainee

January 2017 - May 2017

- Developed a trading application using Angular JS, Node JS, and PostgreSQL.
- Integrated stock market API to fetch real-time data for visualization and analysis with D3 charts.

Skills

- **Frontend:** React.js, React Native, Next.js, TypeScript, Angular, Redux, Zustand, Tailwind CSS
- **Backend:** Node.js, Express, GraphQL, REST API design, Middleware
- **Cloud & DevOps:** AWS (OpenShift, EKS), GCP, Jenkins CI/CD, GitHub Actions, JFrog Artifactory, Docker, Kubernetes
- **Data & Observability:** MongoDB, PostgreSQL, Elasticsearch, Kibana, Dynatrace
- **AI / Agentic Systems:** Google ADK, Gemini/Vertex AI, MCP client/server, Prompt Engineering, Conversational state machine, A2UI
- **Security:** SSL Pinning, HashiCorp Vault, Anti-hooking techniques (ISO 27001 contribution)

Education

Bachelor of Technology, Computer Science Engineering

Vellore Institute of Technology, Vellore

8.91 CGPA

June 2013 - May 2017

CBSE 10th / 12th Standard, Science

10 CGPA / 93.6%
